

GENIUX PHOTO EFX PLUG-IN

GeniuX Photo EFX can work as a Photoshop plugin or a standalone application. Actually, the plugin part all it does is sending and retrieving the images. All processing is done within the main application.

INSTALLATION

Tested software	Edition	Installation
Adobe Photoshop	CS	...Adobe/Adobe photoshop CS/Plug-In/
Adobe Photoshop	CS 2	...Adobe/Adobe photoshop CS/Plug-In/
Adobe Photoshop	CS 3	...Adobe/Adobe photoshop CS/Plug-In/
Adobe Photoshop	CS 4 Win 32 bit	...Adobe/Adobe photoshop CS/Plug-Ins/
Adobe Photoshop	CS 5 Win 32 bit	...Adobe/Adobe photoshop CS/Plug-Ins/
Adobe Photoshop Elements	9 Win 32 bit	...Adobe/Photoshop Elements 9/Plug-Ins/
Corel Paint Shop Pro	X3 Win 32 bit	...Corel\Corel PaintShop Photo Pro\X3\PSPClassic\Languages\EN\PlugIns
Gimp	2.6 Win 32 bit	...GIMP-2.0\bin\plug-ins
Working Software but not tested	Edition	Installation
Corel Paint Shop Pro	X	...Corel/Corel Paint Shop Pro Photo X/Languages/IE/PlugIns/
Corel Paint Shop Pro	X2	...Corel/Corel Paint Shop Pro Photo X2/Languages/IE/PlugIns/
Adobe Photoshop Elements	6	-
Adobe Photoshop Elements	7	-
Adobe Photoshop Elements	8	-

To try the GeniuX Photo EFX Plugin on not tested software you can copy the plugin file “GeniuXPhotoEFX2.8bf” from the installation folder of GeniuX Photo EFX usually C:/Program/GeniuXPhotoEFX or similar.

To install the plugin on Gimp you need pspi.exe installed on plugin folder

To install the plugin on Paint Shop Pro you need Plugin.dll and Msvcrt10.dll installed in your Windows/System folder

IMAGE FILE EXPORT

“GeniuX Photo EFX Plugin” exports only the currently selected layer. In case of problems you should first::

- 1) Collapse all layers (On Photoshop with the command Layer> Collapse All)
- 2) Use the RGB Color 8-bit channel (On Photoshop with the command Image> Mode> RGB Color / 8 bit Channel)

GENIUX PHOTO EFX PLUG-IN

GeniuX Photo EFX può lavorare come programma Standalone oppure come Plugin. La Plugin serve semplicemente per inviare e ricevere le immagini direttamente da GeniuX Photo EFX; tutte le elaborazioni vengono eseguite sempre all'interno del software Standalone.

INSTALLAZIONE

Software testato	Edizione	Installazione
Adobe Photoshop	CS	...Adobe/Adobe photoshop CS/Plug-In/
Adobe Photoshop	CS 2	...Adobe/Adobe photoshop CS/Plug-In/
Adobe Photoshop	CS 3	...Adobe/Adobe photoshop CS/Plug-In/
Adobe Photoshop	CS 4 Win 32 bit	...Adobe/Adobe photoshop CS/Plug-Ins/
Adobe Photoshop	CS 5 Win 32 bit	...Adobe/Adobe photoshop CS/Plug-Ins/
Adobe Photoshop Elements	9 Win 32 bit	...Adobe/Photoshop Elements 9/Plug-Ins/
Corel Paint Shop Pro	X3 Win 32 bit	...Corel\Corel PaintShop Photo Pro\X3\PSPClassic\Languages\EN\PlugIns
Gimp	2.6 Win 32 bit	...GIMP-2.0\bin\plug-ins
Software funzionante ma non testato	Edizione	Installazione
Corel Paint Shop Pro	X	...Corel/Corel Paint Shop Pro Photo X/Languages/IE/PlugIns/
Corel Paint Shop Pro	X2	...Corel/Corel Paint Shop Pro Photo X2/Languages/IE/PlugIns/
Adobe Photoshop Elements	6	-
Adobe Photoshop Elements	7	-
Adobe Photoshop Elements	8	-

Per installare GeniuX Photo EFX Plugin nel software funzionante ma non testato direttamente è sufficiente copiare il file "GeniuXPhotoEFX2.8bf" dalla cartella di installazione di GeniuX Photo EFX C:/Programmi/GeniuXPhotoEFX alla cartella "Plugins" del proprio software di fotoritocco.

Per installare la plugin in Gimp devi installare pspi.exe nella cartella dei plugin di Gimp.

Per installare la plugin in Paint Shop Pro devi installare Plugin.dll e Msvcr10.dll nella cartella Windows/System
